

Key Iraq Events - Power & Renewable Energy

New Solar Projects

Iraq is planning to launch new projects for solar power plants with a total capacity of 5 GW in 2023. Further details about the projects were not disclosed. The Ministry of Electricity has already agreed with local and international companies on the implementation of 7.5 GW of solar projects in the initial stage. Among the planned large-scale solar schemes are three projects totalling 2.75 GW expected to come online in 2025.

including a 1 GW contract with UAE's Masdar, a pact with TotalEnergies for a 1 GWp solar complex and 750 MW of solar capacity to be deployed by Power Construction Corp. of China.
